

Best of MRL-News*

*and other publications from Schmersal/Elan

The most important reforms regarding the functional safety of machinery now summarised in a book

SCHMERSAL

Best of MRL-News

Our MRL-News always provides you with an up-to-date overview of the latest standardisation issues and discussions. As an abundance of reforms and innovations has been released lately and the time in the construction departments keeps getting tighter, we have decided to publish the main reforms and novelties with regard to the functional safety of machines in one volume.

This book titled “Best of MRL-News” is subdivided into different chapters:

- Current legislative bases of machinery safety in Europe and elsewhere
- New requirements placed on safety-related parts of control systems (substitution of EN 954-1 by EN ISO 13849-1:2006/2008)
- Other topical problems and issues of machine safety
- Technological developments of safety components

This book provides you with consolidated yet well-founded knowledge for information and for future reference.

If you would like to receive this book for free, please fill in the order form and return it to us by fax either by mail.

FAX: +49 641 9848-421

I'm interested in the "Best of MRL-News" book.
Please send me _____ free copies.
